Summary

I am a **Senior Frontend Developer** with **8 years of experience** designing and building **user-focused, scalable** web applications. Expertise in **React, Next.js**, and **TypeScript**, with a strong focus on **performance, accessibility**, and developer experience.

Highlights:

- 8 years of frontend experience building web applications with JavaScript, TypeScript, HTML, and CSS
- Accessibility advocate with extensive experience implementing solutions that exceed WCAG compliance
- Expertise migrating legacy JavaScript applications into modular React components and hooks
- Proven track record of optimizing performance, SEO, and core web vitals for web solutions
- Trusted contributor and consultant for technical planning, architecture discussions, and system design
- Conducted hundreds of code reviews while mentoring developers on best practices and maintainability
- Collaborated with marketing and design teams to improve user experience, engagement, and retention
- Consistently delivers well-tested code through unit tests and UI tests using Jest, Vitest, and Storybook

Technical Skills

Programming Languages	TypeScript, JavaScript, HTML, CSS, C#, SQL, PHP, Go
Frontend Development	React, Next.js, Remix, Vue.js, Svelte, Redux, RxJS, Tailwind, Scss, Less, Bootstrap, AJAX, jQuery
Backend Development	Node.js, GraphQL, ASP.NET
DevOps & Cloud	Vercel, AWS, Docker, K8s (Kubernetes), Helm, Azure
Testing & QA	Vitest, Jest, Storybook, Puppeteer
Development Tools	Vite, Webpack, Git, Figma, JIRA, WordPress, Postman
Technical Leadership & Best Practices	Agile, Mentoring, Technical Communication, Timeline Estimation, Requirements Gathering, Documentation, Community Engagement, Scalable Architecture, Performance Optimization

Professional Experience

Senior Frontend Developer (Contract)

Sep 2025 - present

Wattpad - Canada (remote)

Served as a Senior Frontend Developer within Wattpad's User Engagement and Growth team, collaborating with designers, backend engineers, and product stakeholders to deliver user-facing features, improve retention, and reduce friction across a large-scale web platform.

Tech Stack: React, Remix, TypeScript, HTML, CSS, Jest, Docker, AWS, JIRA, GitHub, Figma

- Migrated features from a legacy JavaScript application to React/Remix, improving performance with SSR while increasing maintainability with reusable components and hooks.
- Identified and resolved complex bugs, including XSS security vulnerabilities, improving platform stability and security.
- Enhanced accessibility beyond WCAG requirements, implementing comprehensive keyboard navigation and optimizing content for screen readers.
- Conducted thorough code reviews, providing detailed feedback and mentoring developers.
- Authored technical design documents for feature epics, providing detailed estimates and timelines.
- Coordinated feature-flagged deployments and phased rollouts, minimizing risk while validating changes in production environments.
- Contributed to CI/CD pipelines across multiple repositories and services.
- Managed internationalization efforts and localization workflows through Crowdin, supporting global users across multiple locales.
- Partnered with cross-functional teams to identify user pain points, brainstorm improvements, and deliver enhancements focused on engagement and retention.
- Led project to modernize internal tooling, delivering new features while significantly improving workflow efficiency and usability.
- Drafted informative proof-of-concepts to validate technical approaches and identify implementation risks before full-scale development.

Frontend Developer (Freelance)

Sep 2024 - present

Self-Employed - Canada (remote)

Collaborated with local business owners to translate business goals into effective web solutions, leading discovery, solution design, estimation, and implementation. Delivered custom websites and tools that improved online visibility, user engagement, and business operations.

Tech Stack: Next.js, React, TypeScript, Tailwind, HTML, CSS, Svelte, Shopify, Liquid, Figma

- Pitched, designed, and developed full stack vehicle inventory management website using Next.js featuring secure admin authentication, dynamic web forms, and image optimization.
- Developed automated data ingestion pipelines that consolidated vehicle inventory from partner dealership websites.
- Developed custom Shopify templates and tools using Liquid to support business objectives and improve the customer shopping experience.
- Created a reusable web component using Svelte (Board Foot Calculator) that could be embedded anywhere with minimal integration effort.
- Consolidated analytics platforms and implemented robust event tracking to provide actionable insights into user behavior and identify pain points.
- Improved search visibility and organic traffic through local SEO strategies and page speed optimization.
- Collaborated closely with stakeholders throughout discovery, design, and implementation phases.

Frontend Developer
eLocal - USA (remote)

Feb 2024 - Sep 2024

Collaborated as a Frontend Developer at eLocal, a leading platform connecting consumers with local service professionals. Played a key role in building and optimizing web applications with a strong focus on SEO, accessibility, and performance, while mentoring junior developers and partnering with cross-functional teams to drive user engagement.

Tech Stack: React, Next.js, TypeScript, HTML, CSS, Vitest, AWS, PHP, SQL, WordPress, JIRA, GitHub

- Built SEO-focused marketing SPA with Next.js, achieving 100% performance and web vital scores.
- Enforced WCAG compliance, improving accessibility scores across 10 projects from 60-75% to 100%.
- Elevated page speed scores by 15-25% using SSR and client-side performance optimization.
- Mentored junior developers on React principles, best practices, and state management techniques.
- Conducted A/B tests in collaboration with marketing, boosting engagement and user retention by 20%.
- Developed reusable React hooks, greatly improving developer experience and reducing repetitive code.
- Integrated linting, unit tests, and internationalization to improve code quality of frontend microservices.
- Established a robust CI/CD development workflow with automated tests, PR's, and staging environments.

Frontend/Full Stack Developer
Auvik Networks - Canada (remote)

Jan 2023 - Jan 2024

Engaged as a Frontend specialist within the account management team at Auvik, a network monitoring SaaS platform. Refactored legacy features from monorepo built with Java and jQuery into modular microservices using React, GraphQL, and Go.

Tech Stack: React, TypeScript, HTML, CSS, Jest, Storybook, GraphQL, Go, AWS, Docker, Kubernetes, Helm, JIRA, Gitlab

- Contributed to Auvik's SaaS platform with emphasis on role management and security standards.
- Integrated a unified authentication process for SaaS platforms acquired by Auvik using OAuth.
- Led project to refactor legacy payment form into microservices using React, GraphQL, and Go.
- Seamlessly Integrated iframe under strict constraints using strategic CSS and state management.
- Earned commendation from the design team for my dedication to details when developing UI components.
- Developed robust React components and custom hooks with extensive type safety and unit tests.
- Proactively addressed tech debt, risks, and improvement opportunities during project planning meetings.
- Rigorously documented code with inline JSDoc annotations and flow charts for end-to-end processes.
- Aligned cross-functional teams on feature requirements, reconciling conflicts and presenting strategic implementation options.
- Provided comprehensive feedback during code reviews and wrote descriptive details for pull requests.

Frontend Consultant (Contract)
Bitovi - USA (remote)

Nov 2021 - Nov 2022

Operated as a versatile JavaScript developer and consultant within Bitovi's React Department, serving an array of diverse clients. Proficiently managed a broad spectrum of frontend React projects from short-term individual assignments to substantial, collaborative endeavors within agile teams.

Tech Stack: React, Next.js, TypeScript, JavaScript, HTML, CSS, Jest, Storybook, GraphQL, Redux, Node.js, Material UI, Chakra UI, JIRA, GitHub

- Collaborated on architectural design and development of a frontend electric vehicle comparison application and shared component library using React, Redux, TypeScript, and Charts.js.
- Conducted rigorous unit testing using Jest and leveraged Storybook to showcase UI components and their various states.
- Presented on trending technologies at virtual events, educating developers [\[watch here\]](#).

- Contributed to open source projects like [StackStorm](#) and [react-to-web-component](#).
- Designed a senior-level take-home test and rubric to streamline a client's hiring process.
- Customized and implemented user interface components using Material UI, ensuring seamless integration with React applications and delivering responsive, visually appealing designs.

Frontend/Full Stack Developer

Apr 2020 - Nov 2021

Richmond Day - Canada (remote)

Collaborated closely with project managers, developers, and designers to plan, develop, and maintain websites for an extensive and distinguished clientele, including industry leaders such as MINI, BMW, and LG.

Tech Stack: jQuery, JavaScript, HTML, CSS, Bootstrap, ASP.NET, C#, Entity Framework, AJAX, SQL, WordPress, PHP, Liquid, JIRA, GitHub

- Built frontend for MINI's first virtual retreat, featuring interactive games and contests.
- Developed scalable, database-first applications primarily using ASP.NET, SQL, and jQuery.
- Created interactive web components using JavaScript and customized open source libraries.
- Crafted responsive ads with adaptive content in English, French, and Chinese across multiple regions.
- Implemented pixel-perfect mockups, earning commendation from the design team.

Junior Frontend Developer

Jul 2018 - Apr 2020

LBC IT Solutions - Canada

Developed scalable web applications for diverse clients, from multi-region WordPress sites to large-scale data-driven systems.

Tech Stack: Vue.js, React, jQuery, JavaScript, Material UI, HTML, CSS, Bootstrap, ASP.NET, C#, Entity Framework, SQL, WordPress, PHP, Trello, Bitbucket, Azure

- Developed a dynamic, data-driven, MVC web application for Telus using ASP.NET, SQL, and Vue.js.
- Collaborated on React application with Contentful integration for user friendly article management.
- Independently built and launched WordPress website with a customized theme using Isotope.js and PHP.

Frontend Developer (Contract Internship)

Jan 2017 - Jul 2017

PWC Technologies Inc - Canada

Collaborated in an agile development team contracted by Scotiabank and worked independently on web applications.

Tech Stack: jQuery, JavaScript, HTML, CSS, Bootstrap, AJAX, MySQL, PHP

- Actively participated in scrum meetings and consistently completed sprint tasks ahead of schedule.
- Developed a RESTful web app to fetch, render, and filter nutrition data from nearby restaurants.

Education

Computer Programming & Analysis

Sep 2015 - May 2018

Seneca College - Canada

- Made the dean's list and graduated with honors
- Excelled as a leader and team player for collaborative projects
